Welcoming the strengthening of cooperation within the South East European Cooperation Process since its establishment in 1996,

Aiming to strengthen cooperation in all fields between the SEECP PA participants, encourage economic cooperation, and broaden the dimensions of collaboration in democratic institutions,

Recognising the importance of a balanced, affordable, viable and reliable energy mix for sustainable development in line with the spirit of the UN’s 2030 Agenda for Sustainable Development,

Welcoming the improvements in line with the UN’s Sustainable Development Goal 7 to “ensure access to affordable, reliable, sustainable and modern energy for all”,

Emphasizing the need to strengthen economic and trade cooperation between the SEECP PA participants,

Aiming at the elimination of trade barriers and establishing stable investment climate for effective economic cooperation between the SEECP PA participants,

Encouraging the strengthening of cooperation of the SEECP PA participants in the field of energy and the establishment of regional infrastructural networks,

Stressing the intention to intensify joint efforts directed to the energy diversification and cooperation to support security of supply in the region,

Reaffirming its commitment to provide parliamentary and legislative support to the SEECP PA initiatives in developing economic cooperation,

Recommends the parliaments and the governments of the SEECP PA participants:
1. To support the exchange of information between the SEECP PA participants on legal and administrative structures of the energy sector to foster trade and investments between the SEECP PA participants, *(Amended by Belgrad)*

2. To promote the development of scientific, technical, technological, legal, administrative and commercial cooperation in the fields of energy, primarily in the fields of renewable and clean energy and energy efficiency, hydrocarbons as well as electrical energy taking into account their needs, priorities, policies and related legislation,

3. To support development of energy infrastructures among the SEECP PA participants and improve regional energy trade,

4. To increase the use of renewable energy by promoting relevant legislation.

5. To increase energy efficiency having a wider goal to increase the security of supply,

6. To develop educational and student exchange programs on renewable energy and energy efficiency technologies between universities and related institutes,

7. To organize regional energy conferences/workshops/seminars with participation of public and private sector, experts and scientists,

8. To encourage Energy Service Companies (ESCOs) to improve energy efficiency and utilization of renewable energy of the industry and residential sector.
